## GRINDING WHEELS

### For Circular Saw Sharpening

For those who have indicated an interest in resharpening their own screw slotting saws. Many have found this wheel/spec to work well for sharpening the teeth of dull, hardened metal working saws, thereby giving new life to blades otherwise considered no longer useful.

Of course we offer a resharpening service for those who don't want to do the work themselves.

8" x 3/16" x 1-1/4" or  
8" x 3/16" x 3/4" with  
hole reducer.
