## Winder's Lacing Hook

An economical, time saving tool which speeds up the time consuming job of securing soft magnet wire coils.

The pencil size handle gives the winder better control of the tool (compared to a small curved lacing needle) thereby speeding up the tedious tying/lacing, taping procedure. Practically pays for itself the first time it's used. An absolute must for each winder's toolbox.

Winder's Lacing Hook ..... **Catalog Number** .MARTLH  
Net Weight 1 lb.

## Winder's Horn

This "winder's friend" is especially helpful for forming and shaping the ends of stator coils and armature windings.

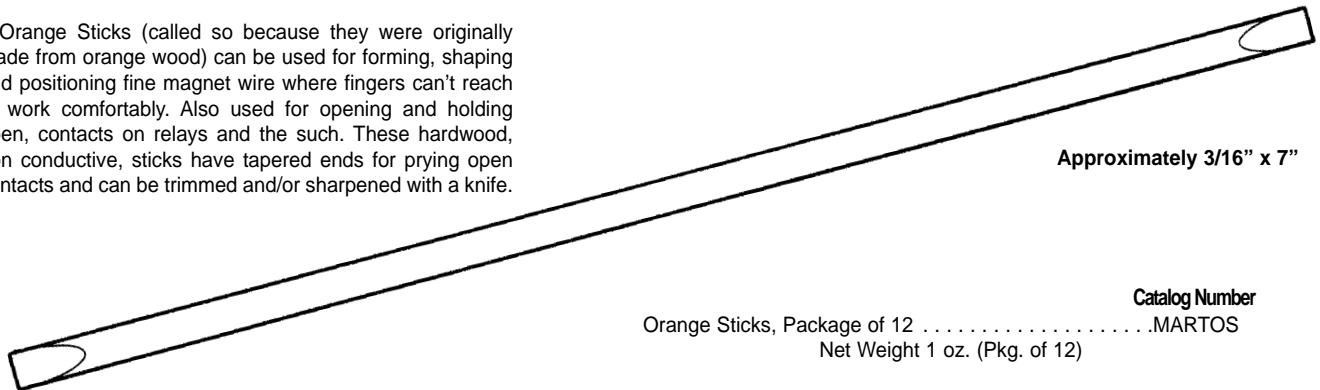

The tool is made of a synthetic fiber material which will not damage the insulating film on magnet wire. Approximately 12" long and a 1/2" thick.

Winder's Horn ..... **Catalog Number** .MARTWH  
Net Weight 2 oz.

## Orange Sticks

Orange Sticks (called so because they were originally made from orange wood) can be used for forming, shaping and positioning fine magnet wire where fingers can't reach or work comfortably. Also used for opening and holding open, contacts on relays and the such. These hardwood, non conductive, sticks have tapered ends for prying open contacts and can be trimmed and/or sharpened with a knife.

Approximately 3/16" x 7"

Orange Sticks, Package of 12 ..... **Catalog Number** .MARTOS  
Net Weight 1 oz. (Pkg. of 12)
