

# Kut-Kwik Undercutter

Three Models — 3 Saw Spindle Speeds

Kut-Kwik is a very small *light-duty* air-driven undercutter designed for reaching into limited spaces where other undercutters cannot be used. It is not meant for the heavier duty and more continuous service of our other portable undercutters. There are now 3 versions of the Kut-Kwik Undercutter available to accommodate the various needs of our customers.

- Model KK32: 4,000 RPM version has gained increased popularity since it was introduced. It is still the most popular and practical unit for use with high speed steel saws and V-Cutters.
- Model KK50: 5,300 RPM version is recommended for use with tungsten carbide saws. It should be noted that because of the brittle nature of carbide, these saws are more susceptible to breakage and should only be used by more skilled operators. The higher price of carbide can normally be justified by the shorter time required to complete a job because of the higher operating speeds and less down-time required to replace cutters.
- Model KK180: 20,000 RPM version is intended for use with diamond coated undercutting wheels. Extremely fast undercutting is made possible by this high speed tool which will more than justify the higher priced diamond wheels. Again, this tool is only recommended for use by more skilled operators.

Minimum compressed air requirement for proper operation is 11 CFM @ 90 PSI.

### Three Models — 3 Saw Spindle Speeds

| Model | RPM    | H.P. | Length  | Wt.    | Catalog Number |
|-------|--------|------|---------|--------|----------------|
| KK32  | 4,000  | .3   | 9-1/2"  | 1-1/2# | KTKW032        |
| KK50  | 5,300  | .3   | 9-1/2"  | 1-1/2# | KTKW050        |
| KK180 | 20,000 | .9   | 11-1/2" | 2-1/2# | KTKW180        |

Net Weight 2-1/2 lbs., Shipping Weight 4 lbs.

Width of head, including saw-retaining nut, only 1-3/16".

| Saws                            |      |       |                |  |

# Mini Kut-Kwik Undercutter

HIGH SPEED

The Mini Kut-Kwik is a compact, high speed (35,000 R.P.M.) air operated undercutter, ideal for use in confined spaces where a standard sized hand held undercutter would be too large. The high-speed allows use of diamond plated wheels for a smooth cutting action. Although this tool can be used continuously on an undercutting operation, it is not intended for heavy cutting.
